## ADDITIONAL INFORMATION FOR THE REGISTRATION OF TRADEMARKS

Trademark means any word, name, symbol, or device or any combination thereof used by a person to identify and distinguish the goods of the person, including a unique product, from those manufactured or sold by others, and to indicate the source of the goods, even if that source is unknown. See Section [482-1\(2\)](#), HRS.

Section [482-22](#), HRS, sets forth the minimum information required to be contained in an application for registration of a mark. Among those requirements is a statement that the applicant is the owner of the mark, the mark is in use, and to the knowledge of the person verifying the application, no other person has registered, either federally or in this State, or has the right to use, the mark either in the identical form thereof or in such near resemblance thereto as to be likely, when applied to the goods or services of the other person, to cause confusion, to cause mistake, or to deceive.

Before filing an application, an applicant should verify that the mark is not presently in use or registered by another person. Ownership of a trademark is acquired by adoption and bona fide use of the trademark in the ordinary course of trade. When an application is filed, the Business Registration Division will conduct a search of registrations on record, for any registration that may be substantially the same or identical to the trademark being applied for.

### **SPECIMEN**

A specimen is a sample of your trademark as used in commerce. It is real-life evidence of how you are actually using your trademark in the marketplace with the goods or services in your application or registration maintenance filing. It's what consumers see when they are considering whether to purchase the goods or services you provide in connection with your trademark.

For goods, a specimen shows your trademark as actually used in commerce with your existing goods in a way that directly associates the trademark with the goods. For example, a specimen could be a label or tag attached to your goods that shows your trademark, a product container or packaging showing your trademark on the packaging, or a website displaying your trademark where your goods can be purchased or ordered.

A specimen for a mark used on goods shows the mark on the actual goods or packaging for the goods. A photograph, scanned copy, screen capture, or printout of the physical specimen showing your mark can be submitted in lieu of a physical sample. Refer to the United States Patent and Trademark Office (USPTO) [Specimens page](#) for more information.

### **TRADEMARK CLASSIFICATIONS AND TYPE OF GOODS**

There are 45 classes, or categories, that cover all goods and services. **Classes 1-34 are for goods**, classes 35-45 are for services. Each class can cover a wide range of goods or services.

Detailed classification information can be obtained from the [United States Patent and Trademark Office](#) (USPTO). Some of the resources available on the USPTO website include:

- [Get ready to search - classification and design search codes](#)
- The [Nice Classification](#) includes a list of goods and services and their classes (the "Alphabetical List") and a list of classes with explanatory notes.
- For expanded class details on what a class includes or does not include, see the [Trademark Manual of Examining Procedure](#) (TMEP). (<https://tmep.uspto.gov/RDMS/TMEP/current#/current/TMEP-1400d1e1.html>)
