

CONTRACTORS LICENSE BOARD
Professional and Vocational Licensing Division
Department of Commerce and Consumer Affairs
State of Hawaii

AGENDA

Date: September 26, 2025

Time: 9:00 a.m.

Place: In-Person Meeting Location: King Kalakaua Conference Room
HRH King Kalakaua Building
335 Merchant Street, First Floor
Honolulu, Hawaii 96813

‘Ōlelo TV: Subject to the availability of ‘Ōlelo personnel, members of the public may also view the meeting by televised live broadcast on ‘Ōlelo TV.

Agenda: The agenda was posted on the State electronic calendar as required by Hawaii Revised Statutes (“HRS”) section 92-7(b).

If you wish to submit written testimony on any agenda item, please email your testimony to contractor@dcca.hawaii.gov or by hard copy mail to: Attn: Contractors License Board, P.O. Box 3469, Honolulu, HI 96801. We request submission of testimony at least 24 hours prior to the meeting to ensure that it can be distributed to the Board members.

Call to Order:

Minutes: Approval of the Applications Committee Meeting Minutes of September 2, 2025 and the Board Meeting Minutes of July 25, 2025.

Committee Reports:

1. Scope of Activity Committee:
Paul Alejado and John Polischeck, Co-Chairpersons
 - a. HelioWing 7 Pole Mounted Solar Array
ProVision Solar

Requests a determination that a C-13 Electrical contractor may perform the installation of the HelioWing 7 Pole Mounted Solar Array in its entirety. A general contractor is not required as the HelioWing 7 Pole Mounted Solar Array is an “apparatus” or “poles” which is included in the C-13 Electrical contractor classification description.

b. Generator Assessment Testing Evaluation 3
Reliable Turbine Services LLC

HELCO Puna Plant contracted with a Prime Contractor to perform a Generator Assessment Testing Evaluation 3. The Prime Contractor subcontracted the Generator Assessment Testing Evaluation 3 to Reliable Turbine Services LLC.

Requesting a determination whether a contractor's license is required for Reliable Turbine Services LLC to perform Generator Assessment Testing Evaluation 3 at the HELCO Puna Plant. A Generator Assessment Testing Evaluation 3 is an electrical test, visual inspections, and assessment of components condition. All generator testing shall be performed in accordance with and comply with InterNational Electrical Testing Association ("NETA") and Institute of Electrical and Electronics Engineers ("IEEE"). All generator and exciter maintenance shall consider guidelines in the Original Equipment Manufacturer ("OEM") manuals.

Reconvene
to Chapter 92

Meeting:

The Board may enter into Executive Session to consider and evaluate personal information relating to individuals applying for professional or vocational licenses in accordance with Hawaii Revised Statutes section 92-5(a)(1), and to consult with the board's attorney on questions and issues pertaining to the Board's powers, duties, immunities, and liabilities in accordance with Hawaii Revised Statutes section 92-5(a)(4).

Appearances

Before the Board:

- a. Xianqiang Weng (Individual)
"B" General building
- b. Ding Group LLC
Zongming Ding, RME

Kelu Zhang, Division of Consumer Advocacy
Ashton Stallings, DCCA Communications Specialist
Kayla Setzler, DCCA Communications Specialist

Call to Order: There being a quorum present, Vice Chairperson Polischek called the meeting to order at 9:02 a.m.

Agenda: The agenda was posted on the State electronic calendar as required by Hawaii Revised Statutes ("HRS") section 92-7(b).

Minutes: It was moved by Mr. Alejado, seconded by Mr. Polischek, and unanimously carried to approve the Applications Committee Meeting Minutes of July 7, 2025 and the Board Meeting Minutes of May 23, 2025.

Committee Reports:

1. Scope of Activity Committee:
Paul Alejado and John Polischek, Co-Chairpersons
 - a. Department of Accounting and General Services, Public Works Division
State Capitol Building, Capitol Pools Improvement (Phase 3), DAGS Job No: 12-10-1046 ("Project")
 - i. Requests a determination of the contractor license(s) required to install the following insulation on the Project: (1) XPS insulation, which is installed directly over the waterproofing membrane and beneath the pedestal-supported pavers; and (2) EPS insulation, which is installed beneath structural slabs at the terraces and column collars.

Frank Young, Wiss, Janney, Elstner Associates, Inc. stated that the insulation is part of this waterproofing system to meet the energy code. They call it an inverted waterproofing or roofing system. Waterproofing is installed directly on a structural concrete deck and the paver and pedestals are above it. The insulation to meet the required energy code is between the concrete deck and paver layers. It also provides some drainage for water however the primary water management layer is on the structural deck. In their experience the roofing, waterproofing, or general contractor installs this insulation.

Mr. Lau inquired, and Mr. Young confirmed that the XPS is a higher density weight bearing foam under a deck and over an occupied space requiring thermal insulation and is under the Roof and Deck Insulation specifications.

Mr. Young stated that the EPS is structural and provides a lower weight and density fill for concrete structures. Mr. Alejado asked what is the main intention for the drainage mat. Mr. Young clarified that the waterproofing is fully bonded on the structural deck. Water is managed on top to ensure that when the insulation sits on the deck, it does not block anything and the drainage mat with a high compression rating is there. This ensures that any water that goes through the system flows to the drain with no more than ¼ inch of

water. With regard to the installation of the insulation and drainage mat, Mr. Young stated that there is no mechanical fastener and it is not structurally adhered; it is ballasted by the pavers. Mr. Alejado inquired if the insulation is ordered pre-sloped or is there sloping on-site. Mr. Young stated that the base layer is usually not sloped, it needs a minimum thickness to meet the R value for the energy code. The top layer is factory sloped; the contractor must lay it out in order to meet the design intent of sloping toward the drain. Mr. Alejado asked what is the thickness of the insulation at the highest point. Mr. Young stated that he believes it is approximately 8 or 10 inches; the lowest point is 4 inches.

Mr. Nishimoto stated that the Board's prior determination was narrow and they are asking if other contractors may install the insulation. Mr. Lau responded that the inquiry before the Board at the April 2025 meeting was whether a C-1 Acoustical and insulation and/or a C-43 Sewer, sewage disposal, drain, and pipe laying contractor may install a drainage mat, 4" XPS foam insulation, and 1/8" protection board on top of an already completed roofing system. The Board determined that a C-1 Acoustical and insulation contractor may install the insulation system. Mr. Nishimoto stated that they are only asking for a determination on this particular project.

Mr. Young stated that EPS is used under structural areas. EPS also has an R value and serves as thermal insulation. Mr. Lau stated that EPS is a lighter weight expanded polystyrene that is used as a filler in lieu of concrete to fill the void and it is used as a thermal insulation. Mr. Young stated yes, the EPS is laid in.

Executive Session:

At 9:15 a.m., it was moved by Mr. Polischeck, seconded by Mr. Alejado, and unanimously carried to enter into executive session to consult with Jordan Ching, Deputy Attorney General, on questions and issues pertaining to the Board's powers, duties, privileges, immunities, and liabilities pursuant to HRS section 92-5(a)(4).

At 9:27 a.m., it was moved by Mr. Polischeck, seconded by Mr. Lau and unanimously carried to move out of executive session and to reconvene to the Board's regular order of business.

Mr. Lau asked which section of the specifications is the EPS under? Justin Matoi, Wiss, Janney, Elstner Associates, Inc. responded Cast-In-Place Structural Concrete.

Recommendation: (1) A C-1 Acoustical and insulation or C-42 Roofing contractor may install the XPS insulation which is installed directly over the waterproofing membrane and beneath the pedestal-supported pavers on the Project; and (2) An "A" General engineering, "B" General building, C-1 Acoustical and insulation, C-31 Masonry, C-31a Concrete cement, or C-42 Roofing contractor may install the EPS

insulation which is installed beneath structural slabs at the terraces and column collars on the Project.

- ii. Requests a determination on the contractor license(s) required to install the art glass panels on pedestals for the pool surface on the Project.

Mr. Lau asked whether the glass panels are cut in the field. Mr. Young stated that the glass panels are premanufactured. The glass pavers are under the Pedestal-Set Art Glass Pavers specifications. The process for installation for the paver on pedestal systems are usually for concrete pavers. The pedestals are ballasted because they don't want to puncture the waterproofing. The glass tiles are loose laid and are heavy enough to serve as a ballast. There are multiple manufacturers of the pedestals and pavers; the Buzon pedestal brochures provided with their inquiry is not the product being installed however, all pedestals are similar. Mr. Alejado asked if the installation is the same as concrete pavers. Mr. Young responded yes, the pavers are tempered and laminated for safety reasons.

Recommendation: A C-21 Flooring, C-25 Institutional and commercial equipment, or "B" General building contractor may install the art glass panels on pedestals on the Project.

- b. Craig Shikuma
Kobayashi, Sugita & Goda LLP

Requests a determination on the contractor license(s) required to apply a porous thermoplastic aliphatic rubber coating (tradename "AquaFlex") to: (1) horizontal concrete and tile sub-surfaces around water play or pool areas, including around drains; and (2) vertical concrete and tile sub-surfaces to curbs and coping. The coating is designed as a soft, safety surface with benefits including heat and slip resistance.

The Board reviewed the inquiry and information provided and discussed that the C-21 Flooring classification would be able to apply Aquaflex. Executive Officer Ito asked whether the C-21 could apply Aquaflex to vertical concrete and tile sub-surfaces to curbs and coping. The Board stated yes.

Recommendation: A C-21 Flooring contractor's license is required to apply a porous thermoplastic aliphatic rubber coating (tradename "AquaFlex") to: (1) horizontal concrete and tile sub-surfaces around water play or pool areas, including around drains; and (2) vertical concrete and tile sub-surfaces to curbs and coping.

c. Toshiba America Energy Systems Corporation ("TAES")

Requests a determination on the contractor license(s) required for TAES field representatives, including field engineers, specialists, technicians, and subcontractors engaged in installation, service, and repair activities. TAES performs maintenance, including the specialty inspections and repairs, of existing steam turbines and generators at power plants. The work includes the disassembly and reassembly of turbines and generators and their associated auxiliary components. The work does not include any construction, piping or electrical modifications.

Mr. Polischek stated that the work described by TAES is routine maintenance and does not require a contractor's license.

Recommendation: Based upon the information provided, a contractor's license is not required to perform maintenance of existing steam turbines and generators at power plants which includes the specialty inspections and repairs and disassembly and reassembly of turbines and generators and their associated auxiliary components.

It was moved by Mr. Alejado, seconded by Mr. Polischek, and unanimously carried to approve the above scope recommendations.

Contractor
Consumer
Education Fund:

Media on Hiring Licensed Contractors

Ashton Stallings and Kayla Setzler, DCCA Communications Specialists, presented the finalized Pipe Dreams PSA. The guests indicated that they liked the PSA and stated that it drives the message to hire a licensed contractor. The guests also stated that the PSA conveys where to find information on licensed contractors.

The Communications team distributed updated numbers for the Spectrum 2025 Partnership Plan – DCCA – Statewide Campaign, July 2025. The updates are not increased prices; it moved the start of the campaign to August (from July) and some of the channels have changed. The proposal also changed the focus from sports to football since football season is starting.

The Communications team stated that the Maui campaign is currently on air. We had over 35,000 in reach with the \$25,000.00 advertising amount thus far. DCCA put \$3,000.00 toward the ceiling fan PSA and almost 44,000 people saw that PSA.

The Communications team proposed \$25,000 toward the Hawaii Association of Broadcasters because they guarantee a 3:1 return ratio for government advertising. The Board asked for the Pipe Dreams and ceiling fan PSA to be aired more than the girl scout PSA. The

Communications team does not need the Board's approval on the percentage of air time for each PSA Board; the Board is trusting the Communications team to carry out their request.

It was moved by Mr. Polischeck, seconded by Mr. Lau, and unanimously carried to approve the final version of the Pipe Dreams PSA; \$25,000.00 for advertising through HAB and \$50,000.00 for advertising through Spectrum from the Contractors Education Fund that was presented today.

Mr. Polischeck stated that in the future, it is important for the Communications team to consider the representative that will be presenting information to the Board. Previously the Board did not understand the information being presented and they felt rushed to make a decision. The Communications team apologized for how the project started. The Board thanked the Communications team for understanding where they are coming from and for their work on this project. The Board requested quarterly updates from the Communications team.

Chapter 91, HRS,
Adjudicatory
Matters:

Chairperson Nishek called for a recess from the Board's meeting at 9:57 a.m. to discuss and deliberate on the following adjudicatory matters pursuant to HRS chapter 91.

1. Settlement Agreements

- a. In the Matter of the Contractor's License of Vanguard Builders, Inc.; Jeffrey B. Hemingway; CLB 2024-146-L

RICO received a complaint from a consumer about a contract to construct a new two-story residence in Honolulu, Hawaii ("the Project"). The complaint alleged that 50% was paid towards the Project when work stopped after there was a disagreement regarding the design build and plan revisions. The complaint alleged poor workmanship by Vanguard Builders, Inc. and Jeffrey B. Hemingway ("Respondents"). In addition, the plumbing subcontractor alleged that plumbing rough-in work was completed but they were not paid for the work by Respondent, despite sending several invoices and email reminders.

RICO alleges the contract for the Project failed to include the required notice of contractor's right to resolve alleged construction defects prior to commencing litigation in written contract. In addition, the contract failed to provide identification of and the percentages of subcontracted work.

If proven at an administrative hearing, the foregoing allegations would constitute violations of the following statutes and/or rules:
Hawaii Revised Statutes ("HRS") § 444-25 (contractor shall pay the subcontractor for any goods/services within ten days after receipt of invoice), HRS§ 444-25.5(b)(2) (failure to provide notice of contractor's right to resolve alleged construction defects prior to commencing litigation in written contract); and Hawaii Administrative Rules § 16-77-80(a)(5) (failure to provide identification and percentages of subcontracted work in written contract).

Respondents agree to pay an administrative fine in the amount of four thousand and no/100 U.S. dollars (\$4,000.00). Payments shall be paid in installments of one thousand and no/100 dollars (\$1,000.00) per month for a period of four (4) months.

- b. In the Matter of the Contractors' Licenses of Maui Life Construction, LLC doing business as Maui Windows and Doors; Andrew L. Keenan; CLB 2024-206-L

RICO received a complaint that on or about January 31, 2024, the Complainant paid a deposit of \$7,625.83 to Maui Windows and Doors to install a new sliding door in each of the Complainant's two homes, located in Hawaii ("the Project"). Bank records reflect that the check was cashed on or about February 6, 2024.

RICO alleges Maui Life Construction, LLC doing business as Maui Windows and Doors and Andrew L. Keenan ("Respondents") fraudulently cashed the deposit check, knowing that the business was closing. Respondents also failed to complete any work on the Project or refund Complainant's money. Additionally, Respondents failed to register the trade name Maui Windows and Doors with the Board.

If proven at an administrative hearing, the foregoing allegations would constitute violations of the following statutes and/or rules:
Hawaii Revised Statutes§ 444-17(1) (any dishonest, fraudulent, or deceitful act as a contractor that causes substantial damage to another) and Hawaii Administrative Rules§ 16-77-8(a) (failure to file a trade name with the Board).

Respondents agree to pay restitution of seven thousand six hundred twenty-six and no/100 U.S. dollars (\$7,626.00). Payments shall be paid in installments of two thousand five hundred forty-two and no/100 dollars (\$2,542.00) per month for a period of three (3) months.

- c. In the Matter of the Contractors' Licenses of Maui Life Construction, LLC doing business as Maui Windows and Doors; Andrew L. Keenan; CLB 2024-313-L

RICO received a complaint that on or about January 11, 2024, the Complainant paid a deposit of \$7,025.00 to Maui Windows and Doors to install three Milgard windows and one Milgard sliding door at an apartment owned by the Complainant, located in Hawaii ("the Project"). Bank records reflect that the check was cashed on January 16, 2024.

RICO alleges Maui Life Construction, LLC doing business as Maui Windows and Doors and Andrew L. Keenan ("Respondents") fraudulently cashed the deposit check, knowing that the business was closing. Respondents also failed to complete any work on the Project or refund the Complainant's money. Additionally, Respondents failed to register the trade name Maui Windows and Doors with the Board.

If proven at an administrative hearing, the foregoing allegations would constitute violations of the following statutes and/or rules: Hawaii Revised Statutes § 444-17(1) (any dishonest, fraudulent, or deceitful act as a contractor that causes substantial damage to another) and Hawaii Administrative Rules § 16-77-8(a) (failure to file a trade name with the Board).

Respondents agree to pay restitution of seven thousand twenty-six hundred twenty-six and no/100 U.S. dollars (\$7,026.00). Payments shall be paid in installments of two thousand three hundred forty-two and no/100 dollars (\$2,342.00) per month for a period of three (3) months.

After discussion, it was moved by Mr. Lau, seconded by Mr. Suehiro, and unanimously carried to approve the Settlement Agreement Prior to Filing of Petition for Disciplinary Action and Board's Final Order in the above cases.

Following the Board's review, deliberation and decisions in these matters, pursuant to HRS chapter 91, Chairperson Nishek announced that the Board was reconvening to its open meeting at 10:03 a.m.

Executive
Session:

At 10:04 a.m., it was moved by Mr. Polischek, seconded by Mr. Alejado, and unanimously carried to enter into executive session pursuant to HRS section 92-5(a)(1), to consider and evaluate personal information relating to individuals applying for professional or vocational licenses cited in HRS section 26-9, and to consult with Jordan Ching, Deputy Attorney General, on questions and issues pertaining to the Board's powers, duties, privileges, immunities, and liabilities pursuant to HRS section 92-5(a)(4).

At 12:25 p.m., it was moved by Mr. Polischeck, seconded by Mr. Alejado and unanimously carried to move out of executive session and to reconvene to the Board's regular order of business.

Appearances

Before the Board:

- a. Zhengyao Zeng (Individual)
"B" General building

Zhengyao Zeng was present with his guest, Bixia Lin, who assisted Mr. Zeng with Mandarin translation. Kelu Zhang, Division of the Consumer Advocate, assisted the Board with verifying the Mandarin translation that Ms. Lin provided.

After discussion Zhengyao Zeng withdrew his application for licensure in the "B" General building classification.

- b. Utilities One Inc
Alexandrin Patron, RME
"A" General engineering

Utilities One Inc and Alexandrin Patron, RME requested to defer their applications to the August 2025 meeting. It was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to defer Utilities One Inc and Alexandrin Patron's, applications for licensure in the "A" General engineering classification to the August 2025 meeting.

- c. Noah S Chong, RME
Helix Electric Inc
C-13 Electrical (approved 3/25)
C-63 High voltage electrical

Noah S Chong requested to defer his application to the September 2025 meeting. After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to defer Noah S Chong's RME application for licensure in the C-63 High voltage electrical classification to the September 2025 meeting.

- d. Oli Home Solutions and Repair LLC
Tai K Gibson, RME
"B" General building

After discussion Oli Home Solutions and Repair LLC and Tai K Gibson, RME withdrew their applications for licensure in the "B" General building classification and amended their applications to apply for licensure in the C-5 Cabinet, millwork, and carpentry remodeling and repairs classification. It was moved by Mr.

Higashihara, seconded by Mr. Alejado to defer Oli Home Solutions and Repair LLC and Tai K Gibson's RME applications pending the submittal of a revised project list verifying forty-eight months of his on-site supervision and direction of his own employees performing work in the broad scope of the C-5 Cabinet, millwork, and carpentry remodeling and repairs classification. Mr. Gibson's revised project list must include additional C-5 projects, detailed description of the work in the C-5 Cabinet, millwork, and carpentry remodeling and repairs classification that his crew (employees) self-performed under his direct, on-site supervision and the work that was subcontracted to other licensed contractors, the number of workers he supervised on each project, the contract amount of each project, and the "Amount of Supervisory Experience" should be commensurate with the number of workers (employees) he supervised, the "Detailed Description of the Work You Supervised", and the "Contract Amount". He must also submit a complete Experience Certificate.

- e. Glenn E Tremble, RME
West Maui Land Company Inc
"B" General building

After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Glenn E Tremble's RME application in the "B" General building classification.

- f. Dome Technology LLC
Jason P South, RME
"A" General engineering (approved 4/25)
C-41 Reinforcing Steel (approved 4/25)
C-48 Structural Steel

After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to defer Dome Technology Inc LLC and Jason South's RME applications for licensure in the C-48 Structural steel classification pending the submittal of a revised project list verifying forty-eight months of his on-site supervision and direction of his own employees performing work in the broad scope of the C-48 Structural steel classification. All information on Mr. South's project list must be specific to C-48 work. Mr. South's revised project list should include a detailed description of the work his crew self-performed under his direct, on-site supervision, including but not limited to, tons of steel, type of bolt connections, torque specifications, and type of welding.

Committee
Reports:

1. Applications Committee Report
Candace Ito, Executive Officer

None

2. Conditional License Report
Lei Ana Green, Executive Officer

- a. Guildworks-HI LLC
Jonah T Lee, RME
C-44b Awnings and patio cover

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Guildworks-HI LLC and Jonah T Lee's RME applications for licensure in the C-44b Awnings and patio cover classification subject to annual reports on financial matters in accordance with HRS section 444-4(1) and HAR section 16-77-24.

- b. Johansen Contracting Inc
Joseph Johansen, RME
"A" General engineering
"B" General building

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Johansen Contracting Inc and Joseph Johansen's RME applications for licensure in the "B" General building classification subject to semiannual reports on financial matters in accordance with HRS section 444-4(1) and HAR section 16-77-24.

- c. J Construction LLC
Jian Ren He, RME
"B" General building

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve J Construction LLC and Jian Ren He's RME applications for licensure in the "B" General building classification subject to semiannual reports on financial matters in accordance with HRS section 444-4(1) and HAR section 16-77-24.

- d. Dynamic Group LLC
Fredrick A Gerdes, RME
"B" General building

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Dynamic Group LLC and Fredrick A Gerdes' RME applications for licensure in the "B" General building classification subject to annual reports on financial matters in accordance with HRS section 444-4(1) and HAR section 16-77-24.

- e. Seluini S Mafi (Individual)
C-31 Masonry

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Seluini S Mafi's application for licensure in the C-31 Masonry classification.

- f. Performance Systems Integration LLC
Joseph M Arakai-Poepoe, RME
C-20 Fire Protection

After discussion it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve Performance Systems Integration LLC and Joseph M Arakai-Poepoe's RME applications for licensure in the C-20 Fire protection classification subject to semiannual reports on financial matters in accordance with HRS section 444-4(1) and HAR section 16-77-24.

3. Applications Committee

Applications Committee Recommendations

- a. Request for Change in Business Status
- b. Request for Waiver of Bond Requirement
- c. Applications for Licensure

It was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to approve, defer, deny, or withdraw the license applications on the Applications Committee Attachment in the above categories as attached to the meeting minutes.

4. Owner-Builder Exemption Applications

Claude R Dickson

After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado and unanimously carried to deny Claude R Dickson's application for an owner-builder exemption to sell his structure within one year of its completion.

5. Examination Committee

Jerry Nishek, Chairperson

Contractors Examination Summary

The Contractors Examination Summary for June 2025 was distributed to the Board for their information.

Recovery Fund: Recovery Fund Report:
Zale T. Okazaki, Esquire

Ms. Okazaki's Recovery Fund Report dated July 19, 2025 was distributed to the Board for their information.

Next Meeting: Friday, August 22, 2025

Adjournment: There being no further business to discuss, the meeting was adjourned at 12:29 p.m.

Taken and recorded by:

/s/ Candace Ito

WORLD4SOLAR

DATASHEET HELIOWING 7

INTRODUCTION HELIOWING 7

The Heliowing series is a modular, flexible solar power plant solution for commercial and residential applications. A Heliowing will not only enable you to produce your own energy, but make parking and charging your car a charm. Integrated LEDs with motion sensors guide you in the dark until you are in the perfect parking position. Thanks to our integrated battery pack, you can store your valuable, green energy in the Heliowing itself or use it right away to charge your EV. All autonomously and independent either grid connected or off-grid. Store up to 24 kWh with the integrated battery pack. Heliowing is a standalone

system and does not require any specific spatial circumstances to be set up.

The easy installation allows placement in tight spaces to make the most out of your valuable real estate whereas the durable and sturdy construction allows for placement in wide, open spaces to withstand high winds and weather. The Heliowing 7 is our model for larger spaces, with a solar array of 22' 7" in width by 22' 8" in depth at 9' 6" entry height. It holds 24 x 410W bifacial 108 half-cell modules with 9.84kWp of solar PV power.

GENERAL

Shelve Temperature	-20°C / -4°F — 50°C / 122°F
Ambient Temperature	-25°C / -13°F — 50°C / 122°F, > 40°C / 104°F Derating, < -15°C / 5°F no battery charging
Humidity	5% ~ 95% (RH) No Condensation
Altitude	< 13,120 ft
Communication	• GSM (SIM card not included) • Cloud monitoring and programming
Installation Modes (Up to 6 units parallel)	• Single unit, off-grid • Single unit, off grid w/ generator • Single unit, grid tied • Single unit, grid tied w/ backup battery
Warranty — Structure	20 years
Warranty — Electric system	10 years
Warranty — PV modules	min. 87,8% capacity after 20 years
Warranty — EV Charger	3 years

STRUCTURE

Material, Main Structure	Steel, 2-layer spray paint, RAL 9005
Material, Column Covers	Steel, 2-layer spray paint, configurable color
Standards	Engineered to IBC 2018/ ASCE 7-16
Standard Loads (ground snow load @ wind load)	• 70 lbs / sqf @ 130mph
Seismic Category	D
Mounting Types	• Mounted to an existing structure • Concrete foundation

LIGHTING

Power Supply	24 V DC, 350 W, MeanWell
Column	4x 84" Industrial grade LED-strip lights
Wing	4x 48" Industrial grade LED-strip lights

PV SYSTEM

Number of PV Panels	24
Rated PV Power	9.84 kWp
Open Circuit Voltage per MPPT	446.40 VDC
CEC Efficiency	96.5 %

ELECTRIC SYSTEM

2 Phase (grid tied)	240 V, 63 A, 6 AWG
2 Phase (off-grid)	208 V Split Phase, 63 A, 6 AWG
Neutral	6 AWG
Continuous AC Power to Grid / Load	9.00 kW
Self Consumption	• Inverter: 60 W • Battery Heating: 85 W • Battery Cooling: 9.6 W • Lighting: 220 W • EV-Charger: 30 W
Operation Modes	• Off-grid • Off-grid with generator • Smart load • Sell back (grid tied) • Sell back, household limited (grid tied) • Meter zero (grid tied) • Time of use (grid tied) • Peak shaving (grid tied)

BATTERY

Battery Options	• No battery • 1 Block: 8.352 kWh • 2 Blocks: 16.704 kWh • 3 Blocks: 25.056 kWh
Nominal Voltage	48 V
PV to Battery to AC Efficiency	93 %

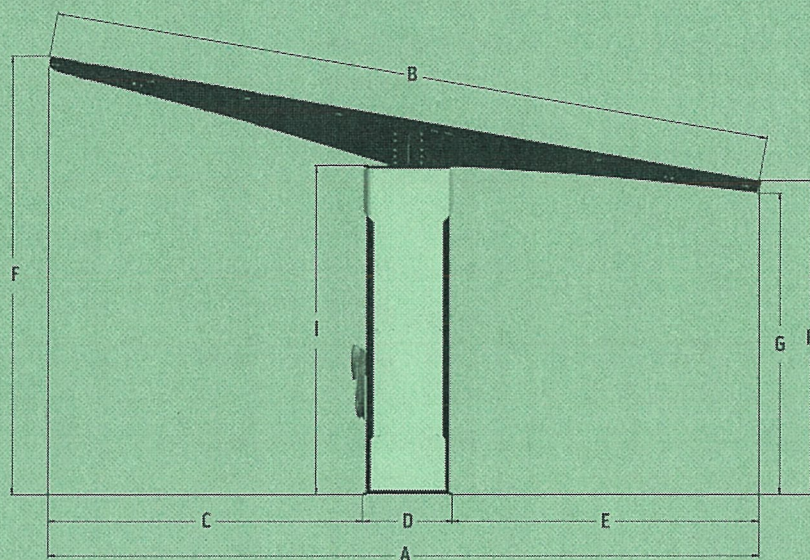

FOUNDATION

Concrete Foundation Types	• Pile Foundation • Excavated Foundation
---------------------------	---

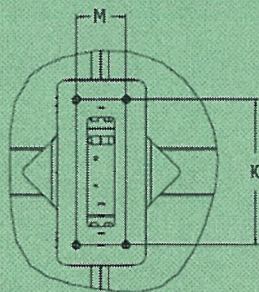

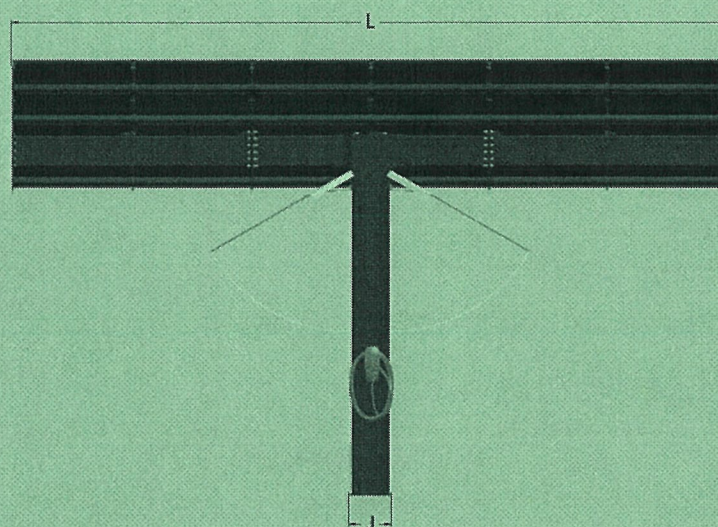

SHIPPING

Main Structure Crate Dimensions (L x W x H)	13' 6" x 3' 8" x 3' 8"
Main Structure Crate Weight (excl. PV panels)	5350 lbs
Weight PV Panels	1180 lbs

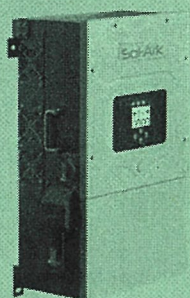

Roof area	512 sqf
Roof inclination	10°, fixed
Covered depth A	22' 4"
Solar array length B	22' 8"
Overhang column to eaves C	9' 11"
Column depth D	2' 10"
Overhang column to ridge E	9' 8"
Ridge height with flush foundation F	13' 10"
Entry height with flush foundation G	9' 6"
Eaves height with flush foundation H	9' 11"
Crossbeam hight with flush foundation I	10' 5"

Covered width L	22' 7"
Column width J	1' 4"
Mounting hole pattern [M x K]	9" x 26.6"

CAD-Data is available upon request in different formats.

SOL-ARK 12K-2P-N INVERTER

Sol-Ark offers all-in-one solutions for inverters. Therefore we can guarantee that the system will run flawless for a long time even under challenging conditions without producing unwanted issues.

PROTECTIONS & CERTIFICATIONS

Electronics Certified Safety by SGS Labs to NEC & UL Specs — NEC 690.4B & NEC 705.4/6	Yes
Grid Sell Back — UL1741-2010/2018, IEEE1547a-2003/2014, FCC 15 Class B, UL1741SA, CA Rule 21, HECO Rule 14H	Yes
PV DC Disconnect Switch — NEC 240.15	Integrated
Ground Fault Detection — NEC 690.5	Integrated
PV Rapid Shutdown Control — NEC 690.12	Integrated
PV Arc Fault Detection — NEC 690.11	Integrated
PV Input Lightning Protection	Integrated
PV String Input Reverse Polarity Protection	Integrated
AC Output Breakers — 63 A	Integrated
250A Battery Breaker / Disconnect	Integrated
Surge Protection	DC Type II / AC Type II

AC OUTPUT SPECS

Surge AC Power 10sec	16,000 VA L-L (240 V)
Surge AC Power 100ms	25,000 VA L-L (240 V)
Fault Current 100ms	104 A L-L (240 V)
Design (DC to AC)	Transformerless DC
Response Time (Grid-Tied to Off-Grid)	4 ms
Power Factor	+/- 0.9 - 1.0

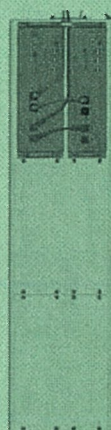

PYLONTECH US3000C & US5000 BATTERY

The US3000C & US5000 are lithium storage systems of the latest generation. The accumulators were specially developed to fully meet the high demands placed on a solar accumulator today. Maximum safety and a long service life are guaranteed even with regular deep discharge thanks to the latest technology.

We combine one US3000C and one US5000 unit to one battery block. A maximum of three of such blocks can be integrated into the Heliowing.

	1 BLOCK	2 BLOCKS	3 BLOCKS
Nominal Capacity	8.352 kWh	16.704 kWh	25.056 kWh
Battery Racks	1x US3000C, 1x US5000	2x US3000C, 2x US5000	3x US3000C, 3x US5000
Charging / Discharging Power	5.6 kW	9 kW	9 kW
Communication Mode	Closed loop, CAN bus, RS485		
Charging Curve	3-Stage w/ Equalization		
Depth of Discharge	95%		
Heating	Electric		
Cooling	Forced air		
Cycle Life	> 6,000 @ 25°C / 77°F		
Ambient Temp. Charging	-15°C / 5°F — 45°C / 115°F		
Ambient Temp. Discharging	-25°C / -13°F — 45°C / 115°F		
Protections / Certifications	UL1973 / UL9540A / IEC62619 / IEC63056 / IEC61000-6-2/3 / UN38.3		

OVERVIEW COMPONENTS

HELIOVIEW 7

APTOS DNA-108-BF10 PV MODULES

Designed and engineered in Silicon Valley — The high-end double glass, bi-facial modules from Aptos are the perfect fit in terms of power capacity, durability and esthetics.

MECHANICAL PROPERTIES

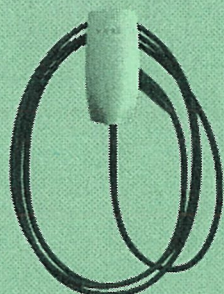

Cell Type	Monocrystalline
Glass	0.126", anti-reflection coating, high transmission, low iron, tempered glass
Frame	Anodized Aluminum Alloy
Junction Box	IP68
Dimensions	67.7" x 44.6" x 1.3"
Output Cable	0.16" 12 AWG, 39.37"
Weight	48.5 lbs

TEST OPERATING CONDITIONS

Maximum Series Fuse	25 A
Maximum Load Capacity (Per UL 1703)	5400 PA Snow Load / 5400 PA Wind Load
Fire Performance Class	Class C / Type 1, 2

OVERVIEW COMPONENTS

HELIOWING 7

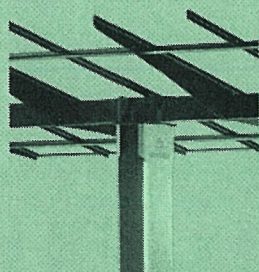

TESLA GEN 3 WALL CONNECTOR EV CHARGER

The Wall Connector is the most convenient charging solution on the market. Thanks to its efficiency, WiFi connectivity and elegant design, it complements the HelioWing not only in functionality, but also in aesthetics.

Cable Length	24'
Ground Fault Circuit Interrupter	Integrated, no additional required (CCID20)
Wi-Fi	2.4 GHz, 802.11b/g/n
Agency Approvals	cULus - E351001
Power Output	7,6 kW

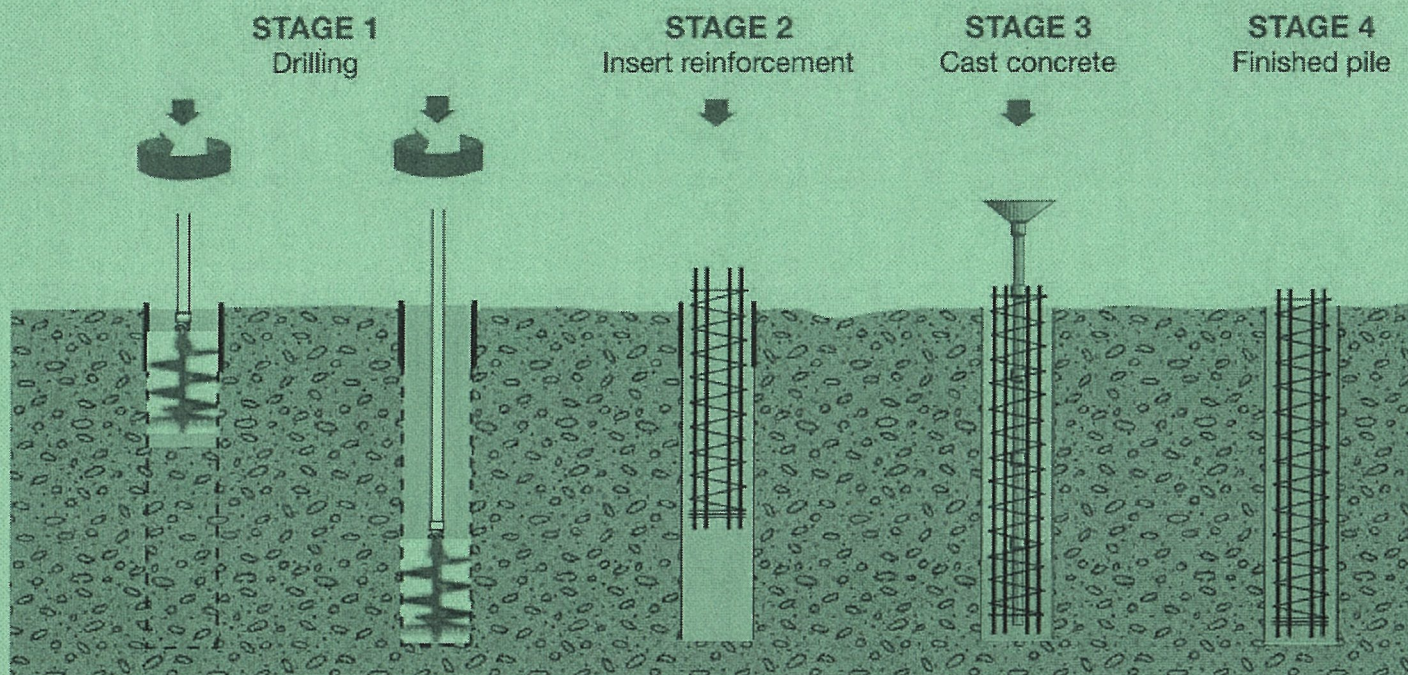

KERN STEEL STRUCTURE

US made high strength steel, robotically welded, manufactured in an ISO 9001/AISC certified US facility. A HelioWing comes with a pre-approved permitting package including structure, foundation and the pre-assembled electrical system from independent civil engineering offices. All components (inverter, battery, light control system, AC connection box) are protected from the elements inside the structure. All cables including the solar panel junction boxes and cables are routed to be covered and protected in order to maintain a clean look from any perspective. Additional space is provided to add power optimizers and/or RSD devices, if needed.

PILE FOUNDATION

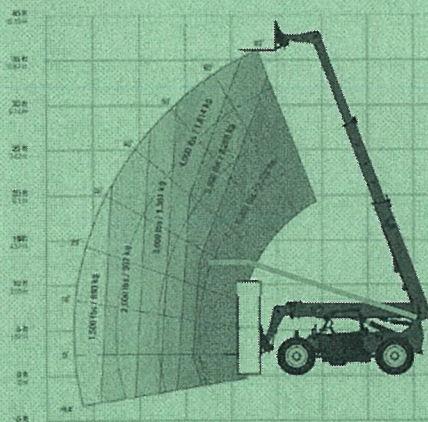

ERECTING THE HELIOWING WITH REACH-FORKLIFT

The Heliowing is designed to be installed with a wide variety of different lifting equipment, e.g. **telescopic forklift**, **truck mounted crane**, **mobile crane**, **spider crane**, **excavator** or others.

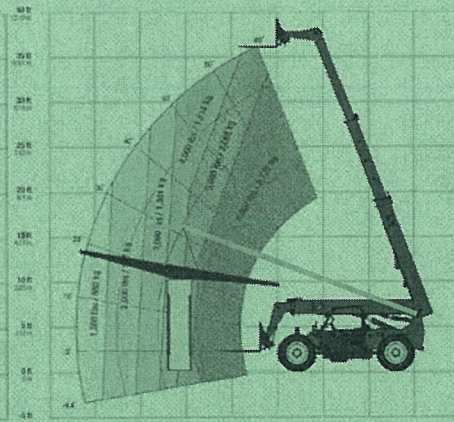

The following table shows the min. parameter for the individual lifts during the installation process:

Lift scenario	Req. capacity	Horizontal reach	Vertical reach	Chain 1	Chain 2
Column installation	1500 lbs	Min. 4'	Min. 12'	Min. 15"	-
VW7 Wing installation – rear		Min. 11'			
VW7 Wing installation – front	4000 lbs	Min. 11'	Min. 18'	Min. 80", Max. 120"	Chain 1 + 5%
VW7 Wing installation – side		Min. 12'			

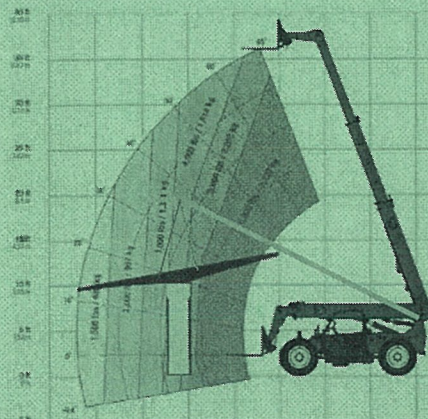

Column installation

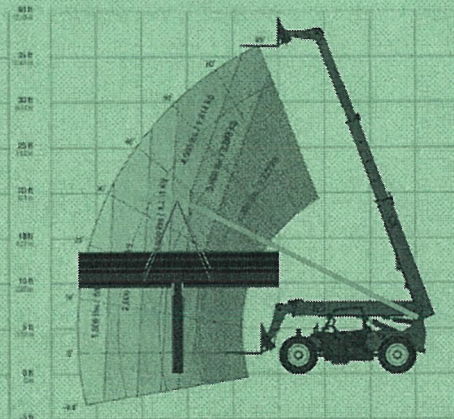

VW7 Wing installation – rear

VW7 Wing installation – front

VW7 Wing installation – side

Contractors License Board
Minutes of the March 22, 2024 Meeting
Page 2

Agenda: The agenda was posted on the State electronic calendar as required by Hawaii Revised Statutes ("HRS") section 92-7(b).

Amendments
To the Agenda: It was moved by Chairperson Arita and seconded by Mr. Alejado to correct the applicant's name to Taylor Sakamoto from Taylor Nakasato under "Appearances Before the Board", item k.

Minutes: It was moved by Mr. Nishek, seconded by Mr. O'Donnell, and unanimously carried to approve the Applications Committee Meeting Minutes of March 4, 2024, and the Board Meeting Minutes of February 23, 2024.

Committee
Reports:

1. Scope of Activity Committee:

Paul Alejado and John Polischeck, Co-Chairpersons

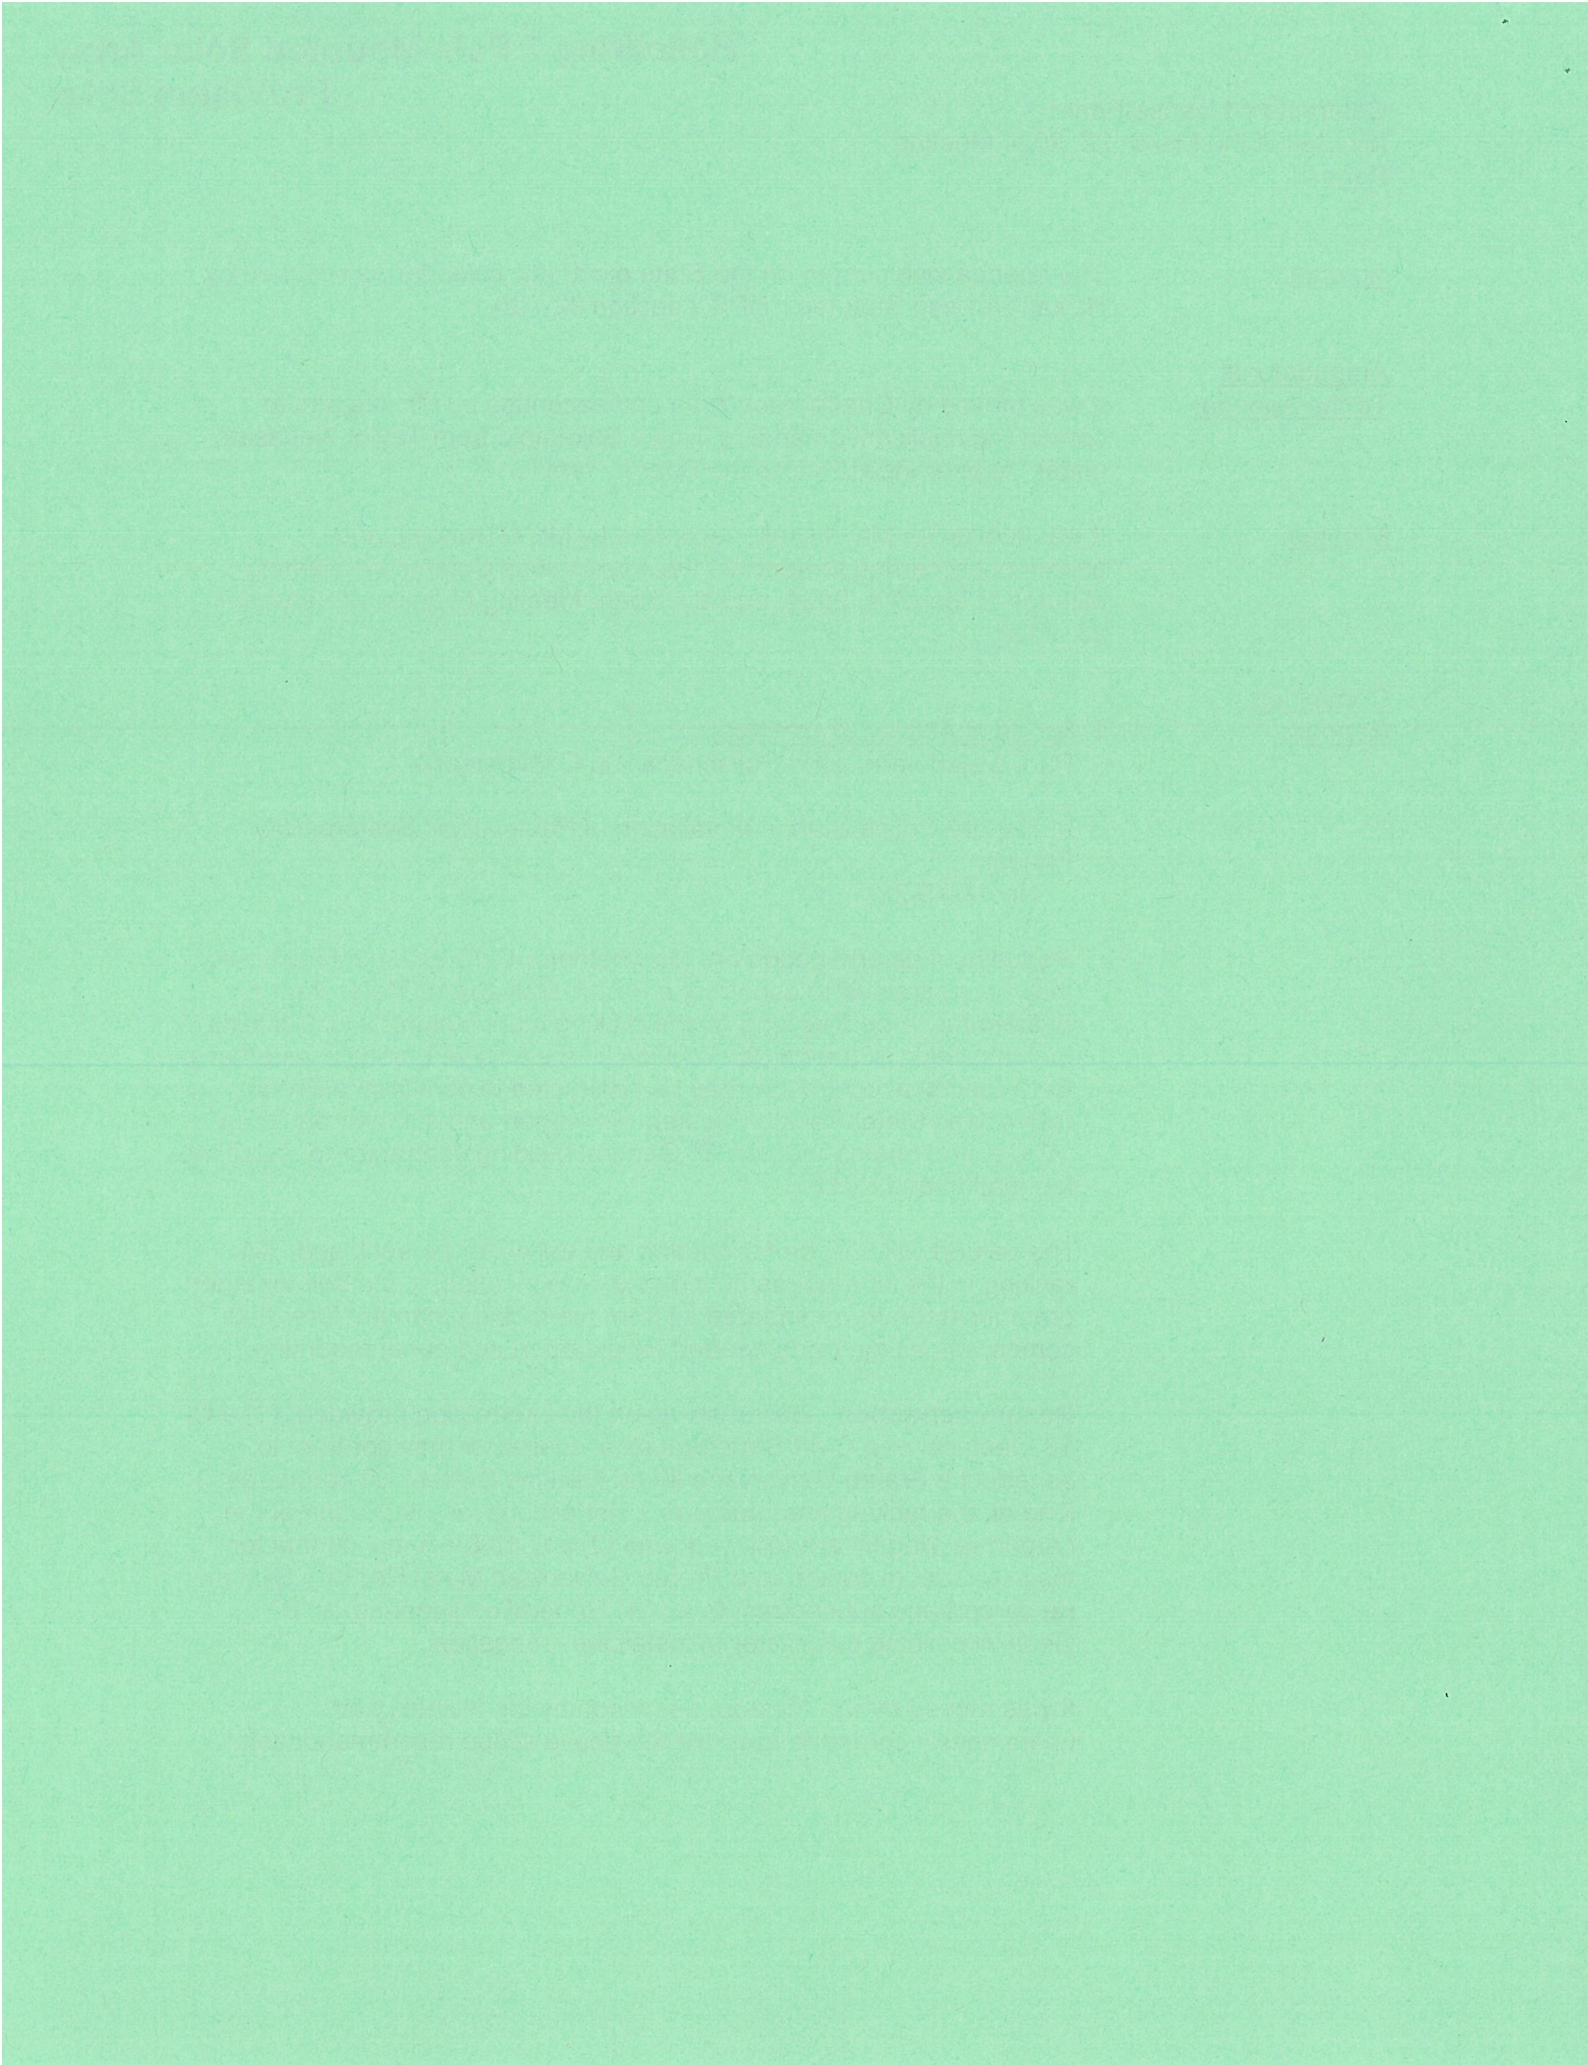

a. Kapolei Police Station Installation of Photovoltaic System, City Project
No. IX-73-22-0

Requests a determination on: (1) whether a C-13 Electrical contractor may be contracted to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed; and (2) whether a C-13 Electrical contractor may be contracted to construct a Prefab Galvanized Metal Racking System Kit carport and subcontract to an "A" General engineering or "B" General building contractor to install the foundation and racking.

The carport will only be for parking and will never be enclosed. All racking in the kit requires no welding or fabrication; it is a bolt together prefabricated/pre-engineered kit from the racking manufacturer that comes with all the parts needed for a carport and panel mounting.

Recommendation: Based solely on the information provided, (1) a C-13 Electrical or a C-48 Structural steel contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed; and (2) a C-13 Electrical contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport and subcontract to an "A" General engineering or "B" General building contractor to install the foundation.

It was moved by Mr. Alejado, seconded by Mr. Nishek, and unanimously carried to approve the above scope recommendation.

Committee
Reports:

1. Scope of Activity Committee:
Paul Alejado and John Polischeck, Co-Chairpersons

a. Joseph O'Donnell

Requests a reconsideration of the Board's March 22, 2024 determination regarding the Kapolei Police Station Installation of Photovoltaic System, City Project No. IX-73-22-0 that based solely on the information provided, (1) a C-13 Electrical or a C-48 Structural steel contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed; and (2) a C-13 Electrical contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport and subcontract to an "A" General engineering or "B" General building contractor to install the foundation.

All racking in the kit requires no welding or fabrication; it is a bolt together prefabricated/pre-engineered kit from the racking manufacturer that comes with all the parts needed for a carport and panel mounting.

Chairperson Arita asked Mr. Hayashi and Mr. O'Donnell to voluntarily recuse themselves from this agenda item. Mr. Hayashi and Mr. O'Donnell recused themselves from this agenda item. Mr. O'Donnell stated that he is recusing himself provided that their counsel would be able to present testimony on their behalf. DAG Leong stated that their attorney could provide testimony on this agenda item.

Mr. George Hetherington, attorney for the Iron Workers Local 625, stated that they have filed a petition for declaratory relief which goes beyond Mr. O'Donnell's request. He requested that the Board change its determination that:

a C-13 Electrical or a C-48 Structural steel contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed

to:

a C-13 Electrical and a C-48 Structural steel contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed.

The Prefab Galvanized Metal Racking System Kit carport requires bolting and the description of the C-48 classification is clear that bolting is one of the functions of the C-48 contractor and bolting can only be performed by a C-48 licensee. He stated that the description of the C-48 Structural steel classification states: To fabricate and erect structural steel shapes, bars, rods, and plates of any profile, perimeter, or cross-section, that are or may be used as structural members for buildings and structures; including riveting, bolting, welding, and rigging. Mr. Hetherington stated that because the description includes bolting, the C-13 contractor is precluded from installing structural supports. He stated that the Contractors License Board does not have the authority to allow the C-13

contractor to go beyond its scope and install structural supports. He requested that the Board consider the petition for declaratory relief that was submitted to the Board's office yesterday in conjunction with the reconsideration of the Board's March 22, 2024 determination.

Executive Officer Ito stated that the petition for declaratory relief is not on the meeting agenda and will not be discussed at today's meeting. Mr. Hetherington has the option to postpone the reconsideration of the Board's March 22, 2024 determination if he wishes to have both matters considered together at next month's Board meeting. Mr. Hetherington stated that they would like the Board to consider their petition for declaratory relief at the next Board meeting regardless of the outcome of its reconsideration today. The Iron Workers Local 625 position is that any kind of structural support that requires bolting, welding, and anything that is listed in the description of the C-48 classification is exclusive to C-48 licensees. Even if the structure is prefab, there is nothing in the C-13 contractor's classification description that allows them to install structural supports and bolting. It is a safety issue if a C-13 contractor is allowed to install the structural supports.

Ryan Takahashi, Hawaii Electricians Market Enhancement Program Fund, stated that in practice, the C-13 contractor will often subcontract the necessary C-48 work to a C-48 contractor for PV panels installed on parking canopies, however, the C-13 is the prime contractor. They don't want to get into a position where both licenses are required to bid the job. They are agreeable if the C-13 contractor is required to subcontract specific work in the scope of the C-48 classification.

Mr. Polischeck stated that in the past, covered parking did not have PV panels on them and the work was performed by the C-48 contractor. Now, the carports are described as a PV project and there is electrical work involved. The racking system is separate from the carport canopy and requires the bolting of PV panels, grounding and bonding. He added that his company builds substations, and the electricians bolt up all the structural steel in the substation. A substation is a controlled environment where the public is not allowed. However, the public will be near and under the carports thus the electrician must understand the torque pattern of the bolts and know the process of what to put up first so that there is not undue stress on other members. The description of the C-13 allows them to put up their own structures for substation and power plant work.

Mr. Suehiro stated that historically, electrical contractors understand bolting, their scope allows them to stand 75 foot structural poles that support lights; the poles are prefabricated and bolted. Electrical contractors should not be precluded from mechanical connections. There is a lot of torquing that is involved in bolt pattern and foundation that hold poles with cantilevers arms over five lanes of highway as well as poles that support traffic signal lights. There is a lot of public safety involved. Electrical contractors cannot be precluded from performing bolting work as historically, this has been part of their work. With regard to carports, the electrical contractor would subcontract the structural columns and cantilever to the C-48 contractor; however, they would install the cross members that support the racking that has bolting and grounding. For this project, there are prefab

galvanized racking that the electrical contractors mount the PV panels on.

Mr. Polischeck stated that he agrees with Mr. Suehiro; all the different trades have bolting and torquing specifications, it is not necessarily a bolting issue. Structural members are historically done by the C-48 contractor who is trained to perform that work. In his company, the iron workers would not know how to stand up light poles, the electricians in his company perform that work. The racking is a separate system that sits on top of the rafters.

Mr. Lau stated that they must consider on a case-by-case basis the disciplines that the work falls under. If it requires structural inspection, it becomes a structural member. If it falls under the electrical division and is reviewed by an electrical engineer, then it is electrical work. It goes back to the contract itself. Chairperson Arita stated that this determination is specific to this project. Mr. Suehiro stated that the plans state, "Solar panel module in portrait layout, racking system, and connection to steel canopy structure by structural solar". Mr. Polischeck stated that the manufacturers are packaging the structural steel canopy with the PV systems.

Executive Officer Ito stated that the Electrical Contractors Association of Hawaii submitted written testimony requesting the Board to uphold its March 22, 2024 determination.

Executive Session: At 9:27 a.m. it was moved by Chairperson Arita, seconded by Mr. Polischeck and carried by majority vote (with Messrs. Hayashi and O'Donnell recusing themselves) to enter into executive session pursuant to HRS section 92-5(a)(4) to consult with Christopher Leong, Deputy Attorney General, on questions and issues pertaining to the Board's powers, duties, privileges, immunities, and liabilities.

At 10:03 a.m. it was moved by Mr. Arita, seconded by Mr. Arita, and carried by majority vote (Messrs. Hayashi and O'Donnell were recused) to move out of executive session and to reconvene to the Board's regular order of business.

Mr. Suehiro stated that based upon the information and testimony provided today, it appears that all parties are on the same page.

Recommendation: Based solely on the information and testimony provided, the Board voted to amend its prior determination and clarified that a C-13 Electrical contractor may contract to construct the Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit for the Project are followed, and perform the electrical work above the purlins which is the racking system that supports the PV panels and the grounding and bonding; provided that the structural steel portion of the Project which is the purlins and below is subcontracted to a C-48 Structural steel contractor.

Mr. O'Donnell stated that the Board is not directly addressing his request as stated on the meeting agenda. Executive Officer Ito stated that the Board felt that changing the determination to:

"a C-13 Electrical and a C-48 Structural steel contractor may contract to construct a Prefab Galvanized Metal Racking System Kit carport as long as the racking manufacturer's instructions for installation of the carport racking kit are followed."

would not be clear and that their amended determination clarifies the C-13 and C-48 work on this project.

It was moved by Mr. Suehiro, seconded by Mr. Polischeck and unanimously carried to approve the above scope recommendation.

Mr. O'Donnell left the meeting at 10:07 a.m.

Executive
Session:

At 10:08 a.m., it was moved by Mr. Polischeck, seconded by Mr. Nishek and unanimously carried to enter into executive session pursuant to HRS section 92-5(a)(1), to consider and evaluate personal information relating to individuals applying for professional or vocational licenses cited in HRS section 26-9, and to consult with Christopher Leong, Deputy Attorney General, on questions and issues pertaining to the Board's powers, duties, privileges, immunities, and liabilities pursuant to HRS section 92-5(a)(4).

At 1:14 p.m., it was moved by Mr. Polischeck, seconded by Mr. Torigoe and unanimously carried to move out of executive session and to reconvene to the Board's regular order of business.

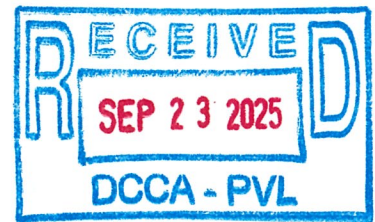

Appearances
Before the
Board:

- a. Leonardo C Machado, RME
Avante Group LLC
"B" General building

Mr. Machado requested an appearance at today's meeting and was not present. After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to deny Mr. Machado's RME application for licensure in the "B" General building classification in accordance with HRS section 444-11(a)(2) and HAR sections 16-77-11(a)(1) and (2), and 16-77-18(a) for lack of experience.

- b. Ya Hua Chen (Individual)
"B" General building

Mr. Chen was unable to attend today's meeting and requested to defer his application to a subsequent meeting. After discussion, it was moved by Mr. Higashihara, seconded by Mr. Alejado, and unanimously carried to defer Mr. Chen's application.

September 22, 2025

From: Marco Mangelsdorf, C-13 RME, ProVision Solar C-26351

To: Hawai'i Contractors License Board

Subject: proposed installation of HelioWing 7 Pole-Mounted Solar Array under C-13 license

I am writing in support of the Board making the determination that the installation of the HelioWing 7 equipment falls under the scope of work as stated under the C-13 language.

Background: We applied for County of Hawai'i building and electrical permits under my license for a pole-mounted solar array for a small business on the Kona side of the Big Island. Mr. Neal Tanaka, County Building Division, had not apparently seen this particular fully engineered design before and declined to approve the permit application as he was unsure whether it fell under the C-13 scope of work. It is my understanding that he and the County will approve the processing of our permit applications in light of the Board's clarification that such work does fall under the C-13 scope of work should the Board make such a determination.

It has been and certainly is my strong contention that the construction of this type of pole-mounted solar array does in fact fall under the scope of work of the C-13 classification. (I've had mine since 2005).

In fact, over the past 20 years I've never experienced an issue like this with the County of Hawaii as we have installed many hundreds of solar electric arrays, both on roofs and constructed free-standing poles and crossmember assemblies to mount solar modules on such structures. Fundamentally, it appears to me that Mr. Tanaka is looking for confirmation/back-up from someone at the State, as in the License Board, to allow him to sign off on this particular permit application.

Further, to my knowledge I will note as well that C-13s across the State's four counties have been installing these types of permitted pole-mounted systems under their licenses, without being compelled to sub out the work to a general contractor, for decades.

My associate Keaka Nelson, ProVision's Engineering Manager, will be there in attendance should you have any questions or concerns.

Thank you for taking up this matter.

Aloha.

Marco A. Mangelsdorf

Cc: Darrell Hoffman
Subject: [EXTERNAL] RE: Reliable Turbine Services - Licensing Question

CAUTION: This email originated from outside of Hawaii State Gov't / DCCA. Do not click links or open attachments unless you recognize the sender and are expecting the link or attachment.

Good morning,

No, I do not have access to National Mechanical Services contract with HELCO Puna Plant – Would you be able to provide the scope of work or contract between National Mechanical Services and HELCO Puna Plant?

Yes, this statement is correct – With regard to the relationship between Reliable Turbine Services, National Mechanical Services, and HELCO Puna Plant, is the following accurate? HELCO Puna Plant contracted with National Mechanical Services to perform a Generator Assessment Testing Evaluation 3. National Mechanical Services subcontracted the Generator Assessment Testing Evaluation 3 to Reliable Turbine Services LLC.

Basically Reliable Turbine Services LLC will be inspecting the condition of a generator to ensure reliable operation.

Below is the work scope:

Inspections/Tests Performed

All Generator testing shall be performed in accordance with and comply with NETA and IEEE. All generator and exciter maintenance shall consider guidelines in the OEM manuals.

Stator and Exciter

- IR of all three phases of the stator windings
- Polarization Index of stator windings
- Copper conductance of stator windings
- Copper conductance of exciter field
- Diodes and fuses checks
- IR of exciter armature
- Stator coil partial discharge visual inspection
- Stator coil slot partial discharge visual inspection
- Manual wedge tap
- EICID Testing on stator

Rotor

- IR of Rotor windings
- Polarization of rotor windings
- AC Impedance Testing of rotor windings
- Copper conductance testing on rotor windings
- AC voltage drop test on field poles
- Winding resistance to shaft of rotor
- Winding resistance to ground
- Visually inspect rotor for partial discharge

Dear Ms. Unger,

Please provide additional details on what is involved in "Generator Assessment Testing Evaluation 3". I am having trouble researching the Contractor License Board's prior determinations with the information you have provided. Would you be able to provide the scope of work or contract between National Mechanical Services and HELCO Puna Plant?

With regard to the relationship between Reliable Turbine Services, National Mechanical Services, and HELCO Puna Plant, is the following accurate? HELCO Puna Plant contracted with National Mechanical Services to perform a Generator Assessment Testing Evaluation 3. Good morning,

Generator Assessment Testing Evaluation 3 – it is an electrical test, visual inspections, and assessment of components condition.

We do not have an agreement directly with HELCO Puna Plant.

Our customer is National Mechanical Services that is in National City, CA 91951.

National Mechanical Services issued our company Reliable Turbine Services LLC a PO to travel to HELCO Puna Plant to perform a Generator Assessment Testing Evaluation 3.

Please let me know if you have any questions or need any additional information.

Dear Ms. Unger,

Please provide additional information on what is entailed in "Generator Assessment Testing Evaluation 3". For example, do you have the scope of work in the contract with HELCO Puna plant?

Also, please explain the relationship between Reliable Turbine Services, National Mechanical Services, and HELCO Puna Plant.

Thank you for your inquiry.

Hello,

I have a little more additional information to add to my previous email below that may be helpful.

Our purchase order is with National Mechanical Services not directly with HELCO Puna Plant.

Does this mean that National Mechanical Services would be the one responsible for the Contractor License?
